**Note 1. The Group and its operations**

**(a) Organization and operations**

The Open Joint Stock Company “Mosenergo” (the “Company”) and its subsidiaries (together referred as the “Group” or the “Mosenergo Group”) are primarily involved in generation of heat and electric power and heat distribution services in the Moscow city and Moscow region.

The Group’s power and heat generation base includes 15 power stations with operational capacity equaled approximately 11,894 megawatts (“MW”) and 34,830 gigacalories/hour (“Gkal/h”) of electricity and heat capacity, respectively.

OJSC “Mosenergo” was registered under the legislation of the Russian Federation on 6 April 1993 in accordance with State Property Management Committee Decree 169-R dated 26 March 1993 following the privatization process of electricity and heat power generation, transmission and distribution assets formerly under control of the Ministry of Energy of the Russian Federation .

The Company’s registered office is located at 101/3, Prospekt Vernadskogo, Moscow, 119526, Russian Federation.

**(b) Group formation**

On 1 April 2005, the Company was reorganized through a spin-off following the reorganization process within the Russian electricity sector aimed to introduce competition into the electricity market and to enable the companies of electricity sector to maintain and further expand production capacity. The Company’s restructuring was approved by general shareholder’s meeting on 28 June 2004. Before the restructuring took place the Company operated as an integrated utility model, which included generation, transmission and distribution activities. As a result of the restructuring 13 new entities were separated from the Company and each shareholder of the Company received ordinary shares of each of the separated entities pro rata to Company’s shares held by them prior to spin-off.

A general shareholders’ meeting held on 20 December 2006 approved a closed subscription for the additional shares issued in favour of OJSC “Gazprom” and its affiliates (together referred as the “Gazprom Group”). As a result, the majority shareholder of OJSC “Mosenergo” changed from RAO UES of Russia to “Gazprom Group” holding 53.47% of ordinary shares. Following the reorganization process, an extraordinary general shareholder’s meeting of RAO UES of Russia on 26 October 2007 approved the spin-off of several holding companies to which shares in electricity generation companies, including OJSC “Mosenergo”, held by RAO UES of Russia, were transferred. Holdings separated from RAO UES of Russia were merged with generation companies by means of shares conversion, which enabled the shareholders of RAO UES of Russia to receive direct shares in generation companies after reorganization. Accordingly, upon spin-off from RAO UES of Russia OJSC “Mosenergo Holding” (the “Mosenergo Holding”) received stake in OJSC “Mosenergo” held by RAO UES of Russia. Simultaneously with the spin-off “Mosenergo Holding” was merged with the Company and its shares were converted into the Company’s shares.

In February 2009, the Company’s Board of Directors approved a program to improve the Company’s organisational structure, which is aimed to concentrate production resources, optimize the labor capacity and supply chain. Organisational structure optimisation included the merge of several production branches situated geographically close to each other, reallocation and outsourcing of non-core functions.

In April 2009 OJSC “Gazprom” transferred its 53.47% share in the Company to its 100% subsidiary LLC “Gazpromenergoholding” (previously - LLS “Gazoenergeticheskaya Kompaniya”) which became the parent company of OJSC “Mosenergo”.

**(c) Business environment**

The Russian Federation displays certain characteristics of an emerging market, including relatively high inflation and high interest rates. The recent global financial crisis has had a severe effect on the Russian economy and the situation in the Russian financial and corporate sectors significantly deteriorated since mid-2008. In 2010, the Russian economy experienced a moderate recovery of economic growth. The recovery was accompanied by a gradual increase of household incomes, lower refinancing rates, stabilisation of the exchange rate of the Russian Rouble against major foreign currencies, and increased liquidity levels in the banking sector.

The tax, currency and customs legislation within the Russian Federation is subject to varying interpretations and frequent changes. The future economic direction of the Russian Federation is largely dependent upon the effectiveness of economic, financial and monetary measures undertaken by the Government, together with tax, legal, regulatory and political developments.

Management determined impairment provisions by considering the economic situation and outlook at the end of the reporting period. Management is unable to predict all developments which could have an impact on the Russian economy and consequently what effect, if any, they could have on the future financial position of the Group. Management believes it is taking all the necessary measures to support the sustainability and development of the Group’s business. The financial

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

statements reflect management's assessment of the impact of the Russian business environment on the operations and the financial position of the Group. The future business environment may differ from management's assessment.

**(d) Relations with the state and current regulation**

At the end of the reporting period the Russian Federation owned (both direct and indirect ownership) over 50% in OJSC "Gazprom" (the previous "Parent"), which held 53.47% of the Company through its 100% subsidiary LLC "Gazprom Energoholding" (immediate parent company). Thus the OJSC "Gazprom" is the ultimate parent company of the Group and Russian Federation is the ultimate controlling party of the Group.

The government of the Russian Federation directly affects the Group's operations through regulations of wholesale and retail sales of electricity and heat exercised by the Federal Service on Tariffs (the "FST") and the Regional Energy Commissions of Moscow and Moscow region (the "RECs"), respectively. OJSC "System Operator - Central Dispatch Unit of Unified Energy System" (the "SO - CDU UES"), which is controlled by the Russian Federation, regulates operations of generating assets of the Group.

The Group's customer base as well as suppliers' chain includes a large number of entities controlled by or related to the state.

As described in Note 6 and Note 32, the government's economic, social and other policies could materially affect operations of the Group.

**(e) Industry restructuring**

Following the restructuring of the Russian electric utility sector aimed to introduce competition to the electricity (capacity) market, the New Wholesale Electric Power (capacity) Market Rules of the Transitional period (the "NOREM"), approved by Resolution of the Government of the Russian Federation № 529 dated 31 August 2006, were adopted. Under this new framework, electricity and capacity purchase-sales transactions in the regulated market sector are to be governed by a regulated bilateral contract system. Starting 1 September 2006 regulated contracts covered all volumes of electricity and capacity produced and consumed.

Starting 2007, the volumes of electricity and capacity traded in the wholesale market applying regulated prices are to be substantially reduced pursuant to Russian Federation Government Resolution No. 205 dated 7 April 2007 "On amending certain resolutions of the Russian Federation Government related to the calculation of electricity volumes sold at free (competitive) prices". The Resolution states that electricity and capacity supplied at regulated prices will gradually decrease.

The period from 2006 to 2011 is considered as a transitional period. Upon the termination of the transitional period, the organization of a competitive market for electricity market will be completed.

Electricity volumes produced, not covered by the regulated contracts, is traded at unregulated prices on the basis of free bilateral contracts or on a day-ahead market. Under free bilateral contracts market participants have the right to choose contracting parties, prices and volumes. The day-ahead market is based on competitive selection of bids submitted by suppliers and buyers the day before the electricity is supplied.

Starting 2011 the majority of the contracts for electricity and capacity supply will be engaged at unregulated prices: free bilateral contracts or on a day-ahead market.

The introduction of the new wholesale market also covered capacity trading. Before the new market rules launch, suppliers were paid only for 85% of installed capacity at a flat-rate tariff. The new rules result in separate tariffs for electricity and capacity. Capacity tariffs are planned to be established at levels sufficient to maintain generation facilities of producers.

According to Russian Federation Government Resolution № 89 dated 24 February 2010 starting 1 January 2011 the capacity will be supplied using the following schemes at the wholesale market: capacity trading at Commercial Capacity Selection for the following year; capacity trading with the free buying and selling contracts; capacity trading using Capacity Supply Contracts; capacity trading of necessitate generators (power generating objects which were not selected during commercial capacity selection but their functioning is necessary due to technological or other reasons). Capacity Supply Contracts on the one part - support obligations of the capacity suppliers for the completion of their investment program, on the other part – grant the settlement for the capacity generated by the new (modernized) generating objects.

**Note 2. Basis of preparation**

**(a) Statement of compliance**

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRSs”).

**(b) Basis of measurement**

The consolidated financial statements are prepared on the historical cost basis except that property, plant and equipment and investment property are revalued periodically; investment property are measured at fair value; available-for-sale financial assets are measured at fair value; and the carrying amounts of equity items in existence at 31 December 2002 include adjustments for the effects of hyperinflation, which were calculated using conversion factors derived from the Russian Federation Consumer Price Index published by the Russian Statistics Agency, GosKomStat. Russia ceased to be hyperinflationary for IFRS purposes at 1 January 2003.

The methods used to measure fair values are discussed further in Note 4.

**(c) Functional and presentation currency**

The national currency of the Russian Federation is the Russian Rouble (RR), which is the Group’s functional currency and the currency in which these consolidated financial statements are presented. All financial information presented in RR has been rounded to the nearest million.

**(d) Use of estimates and judgment**

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes:

- Note 7 – Property, plant and equipment;
- Note 8 – Investment property;
- Note 17 – Employee benefits;
- Note 20 – Provisions, and
- Note 33 – Operating segments.

**Note 3. Significant accounting policies**

The accounting policies set out below have been applied consistently to all periods presented in these consolidated interim financial statements, and have been applied consistently by the Group entities.

**(a) Basis of consolidation**

**(i) Subsidiaries**

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

**(ii) Associates (equity accounted investees)**

Associates are those entities in which the Group has significant influence, but not control, over the financial and operating policies. Associates are accounted for using the equity method (equity accounted investees) and are recognised initially at cost. The Group’s investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group’s share of the income and expenses and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases. When the Group’s share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments) is

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

**(iii) Transactions eliminated on consolidation**

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

**(b) Foreign currency transactions**

Transactions in foreign currencies are translated to the functional currency of the Company at exchange rates at the dates of transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at the date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that fair value was determined. Foreign currency differences arising on retranslation are recognised in profit or loss, except for differences arising on the retranslation of available-for-sale equity instruments.

**(c) Financial instruments**

**(i) Non-derivative financial instruments**

Non-derivative financial instruments comprise investments in equity and debt securities, trade receivables, cash and cash equivalents, loans and borrowings, and trade and other payables.

Non-derivative financial instruments are recognised initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs. Subsequent to initial recognition non-derivative financial instruments are measured as described below.

*Cash and cash equivalents* comprise of cash balances and call deposits. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

*Loans and receivables* consist of financial assets with fixed or determinable payments that are not quoted in an active market, other than those that the entity intends to sell immediately or in the near term, which shall be classified as held for trading, and those that the entity upon initial recognition designates at fair value through profit or loss.

*Held-to-maturity investments*

If the Group has the positive intent and ability to hold debt securities to maturity, then they are classified as held-to-maturity. Held-to-maturity investments are measured at amortised cost using the effective interest method, less any impairment losses.

*Available-for-sale financial assets*

The Group's investments in equity securities and certain debt securities are classified as available-for-sale financial assets. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses, and foreign exchange gains or losses on available-for-sale monetary items, are recognised directly in other comprehensive income. When an investment is derecognised, the cumulative gain or loss in other comprehensive income is transferred to profit or loss.

**(ii) Share capital**

*Ordinary shares*

Ordinary shares are classified as equity. Incremental costs directly attributable to issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

*Repurchase of share capital (treasury stock)*

When share capital recognised as equity is repurchased, the amount of the consideration paid which includes directly attributable costs, is net of any tax effects, and is recognised as a deduction from equity. Repurchased shares are classified as treasury shares and are presented as a deduction from total equity. When treasury shares are sold or reissued subsequently, the amount received is recognised as an increase in equity, and the resulting surplus or deficit on the transaction is transferred to / from retained earnings.

**(d) Property, plant and equipment**

**(i) Recognition and measurement**

Until 31 December 2006, items of property, plant and equipment, except for land, were measured at cost less accumulated depreciation and impairment losses. The cost of property, plant and equipment at 31 December 1997, the date of transition to IFRSs, was determined by reference to its fair value at that date and subsequently restated to take into account the impact of inflation until 31 December 2002.

The Group changed its accounting policy to revaluing its property, plant and equipment starting from 1 January 2007 as management believes that it would provide the users of the financial statements with more relevant information about the financial position of the Group.

Property, plant and equipment are subject to revaluation on a regular basis to ensure that the carrying amount does not differ materially from that, which would be determined using fair value at the balance sheet date. Increase in the carrying amount of property, plant and equipment as a result of revaluation is credited directly to other comprehensive income under the heading revaluation reserve, unless the decrease of the reserve was previously recognised in profit or loss. Decrease in the carrying amount shall be debited to other comprehensive income to the extent of any credit balance existing in the revaluation reserve. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revaluated amount of the asset.

The tax effects from the revaluation of property, plant and equipment are recognized in other comprehensive income and accumulated in equity.

Cost of acquired assets includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials, direct labor and any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

Borrowing costs that are directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of that asset.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are recognised net in “other operating expenses” in profit or loss. The revaluation surplus is not transferred from reserve when the assets are disposed.

**(ii) Reclassification to investment property**

When the use of property changes from owner-occupied to investment property, the property is remeasured to fair value and reclassified as investment property. Any gain arising on remeasurement is recognized in profit or loss to the extent the gain reverses previous impairment loss on a specific property, with any remaining gain recognized in the revaluation reserve directly in other comprehensive income. Any loss is recognized in the revaluation reserve directly in other comprehensive income to the extent that an amount of revaluation is included in other comprehensive income relating to a specific property, with any remaining loss recognized immediately in profit or loss.

**(iii) Reclassification to assets held-for-sale**

When the carrying amount of property is to be recovered principally through a sale transaction rather than through continuing use, the property is remeasured to fair value and reclassified as assets held for sale. Any gain arising on remeasurement is recognized in profit or loss to the extent the gain reverses previous impairment loss on a specific property, with any remaining gain recognized in the revaluation reserve directly in other comprehensive income. Any loss is recognized in the revaluation reserve directly in other comprehensive income to the extent that an amount of revaluation is included in other comprehensive income relating to a specific property, with any remaining loss recognized immediately in profit or loss.

**(iv) Subsequent costs**

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in the profit or loss as incurred.

**(v) Depreciation**

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of lease term. Depreciation of an asset begins when it is available for use.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

Depreciation methods, useful lives and residual values are reviewed at each reporting date. The estimate useful lives for the year 2010 were not changed for the year 2011 and were as follows:

- Buildings and constructions 20-60 years
- Plant and equipment 10-30 years
- Transmission networks 5-30 years
- Other 1-15 years

**(e) Intangible assets**

**(i) Other intangible assets**

Other intangible assets that are acquired by the Group, which have finite useful lives, are measured at cost less accumulated amortization and accumulated impairment losses.

**(ii) Subsequent expenditure**

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred.

**(iii) Amortisation**

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use. The estimated useful lives of the software for the current and comparative periods equal to 7 years.

**(f) Investment property**

Investment property is property or construction in progress held or constructed either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is measured at fair value with any change therein recognised in profit or loss.

When the use of a property changes such that it is reclassified as property, plant and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting.

When the carrying amount of property is to be recovered principally through a sale transaction rather than through continuing use the property is remeasured to fair value and reclassified as assets held for sale. Any gain or loss on the remeasurement recognised in profit or loss.

**(g) Leased assets**

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

**(h) Inventories**

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted average cost principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

**(i) Impairment**

**(i) Financial assets**

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. An impairment loss in respect of an available-for-sale financial asset is calculated by reference to its fair value.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

All impairment losses are recognised in profit or loss. An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognised. For financial assets measured at amortised cost the reversal is recognised in profit or loss.

Impairment losses for available-for-sale financial assets are recognised in profit or loss for the year when incurred as a result of one or more events (“loss events”) that occurred after the initial recognition of available-for-sale investments. A significant or prolonged decline in the fair value of an equity security below its cost is an indicator that it is impaired. The cumulative impairment loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that asset previously recognised in profit or loss – is reclassified from other comprehensive income to finance costs in profit or loss for the year. Impairment losses on equity instruments are not reversed through profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through current period’s profit or loss.

**(ii) Non-financial assets**

The carrying amounts of the Group’s non-financial assets, other than investment property, inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset’s recoverable amount is estimated. For goodwill and intangible assets that have indefinite lives or that are not yet available for use, the recoverable amount is estimated each year at the same time.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the “cash-generating unit”). The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to cash-generating units that are expected to benefit from the synergies of the combination.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its estimated recoverable amount. Impairment losses are recognised in other comprehensive income if revaluation reserve existing to such assets, otherwise in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

**(j) Non-current assets held for sale**

Non – current assets that are expected to be recovered primarily through sale rather than through continuing use are classified as held-for-sale. Immediately before classification as held-for-sale, the assets are remeasured in accordance with the Group’s accounting policies. Thereafter generally the assets are measured at the lower of their carrying amount and fair value less cost to sell. Any impairment loss on a disposal group is allocated to remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, investment property and biological assets, which continue to be measured in accordance with the Group’s accounting policies. Impairment losses on initial recognition as held-for-sale and subsequent gains or losses on remeasurement are recognised in profit or loss. Gains are not recognised in excess of any cumulative impairment loss.

**(k) Employee benefits**

**(i) Defined contribution plans**

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an employee benefit expense in profit or loss when they are due.

**(ii) Defined benefit plans**

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Group’s net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. Any unrecognised past service costs and the fair value of any plan assets are deducted. The discount rate is the yield at the reporting date on Russian government bonds that have maturity dates approximating the terms of the Group’s obligations and that are denominated in the same currency in which the benefits are expected to be paid. The calculation is performed annually by a qualified actuary using the projected unit credit method.

When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognised in profit or loss on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognised immediately in profit or loss.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

Actuarial gains and losses which arise in the reporting period stay unrecognised. The Company recognises a portion of its actuarial gains and losses as income or expense if the net cumulative unrecognised actuarial gains and losses at the end of the previous reporting period exceeded the greater of:

- 10% of the present value of the defined benefit obligation at that date (before deducting plan assets);
- 10% of the fair value of any plan assets at that date.

The portion of actuarial gains and losses to be recognised for each defined benefit plan is the excess determined as described above, divided by the expected average remaining working lives of the employees.

**(iii) Other long-term employee benefits**

The Group's net obligation in respect of long-term employee benefits other than pension plans is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is the yield at the reporting date on Russian government bonds that have maturity dates approximating the terms of the Group's obligations. The calculation is performed using the projected unit credit method. Any actuarial gains or losses are recognised in profit or loss in the period in which they arise.

**(iii) Termination benefits**

Termination benefits are recognised as an expense when the Group is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the Group has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably.

**(iv) Short-term benefits**

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

**(l) Provisions**

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

**(m) Segment reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief operating decision-maker. The Chief operating decision-maker responsible for allocating resources and assessing performance of the operating segments has been identified as a combination of the Board of Directors and Chief Executive Officer who are jointly make strategic decisions.

**(n) Revenues**

**(i) Goods sold**

Revenues from sales of electricity and heat are recognised when electricity and heat are supplied to customers.

Revenue from the sale of goods other than electricity and heat is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue is recognised when the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. Transfers of risks and rewards vary depending on the individual terms of the contract of sale.

**(ii) Services**

Revenue from services rendered is recognised in profit or loss in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed by reference to surveys of work performed.

**(iii) Rental income**

Rental income from investment property is recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

**(o) Government subsidies**

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

Government subsidies are assistance by government in the form of transfers of resources to the Group in return for past or future compliance with certain conditions relating to the operating activities of the Company.

Government subsidies are recognised initially as deferred income when there is reasonable assurance that they will be received and that the Company will comply with the conditions associated with the subsidy. Subsidies that compensate the Company for expenses incurred are recognised in profit or loss on a systematic basis in the same periods in which the expenses are recognised. Government subsidies that compensate the Company for the cost of an asset are recognised in the statement of comprehensive income on a systematic basis over the useful life of the asset. Unconditional government subsidies are recognised on profit or loss when subsidy becomes receivable. Government subsidies for the compensation of the difference between tariffs set to the urban population and the tariffs of the Company are recognized as income and included in other operating income.

**(p) Lease payments**

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

**(q) Financial income and expenses**

Financial income comprises interest income on funds invested (including available-for-sale financial assets), dividend income and gains on the disposal of available-for-sale financial assets. Interest income is recognised as it accrues in profit or loss, using the effective interest method. Dividend income is recognised in profit or loss on the date that the Group's right to receive payment is established, which in the case of quoted securities is the ex-dividend date.

Financial expenses comprise interest expense on borrowings, unwinding of the discount on provisions and impairment losses recognised on financial assets. All borrowing costs are recognised in profit or loss using the effective interest method.

Foreign currency gains and losses are reported on gross basis.

**(r) Income tax expense**

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised in other comprehensive income, in which case it is recognised in the consolidated statement of changes in equity.

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable the profit or loss, and differences relating to investments in subsidiaries and associates to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

**(s) Earnings per share**

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise convertible notes and share options granted to employees.

*(t) New Standards and Interpretations*

(i) The following new Standards, amendments to Standards and Interpretations are not yet effective at 31 March 2011, and have not been applied in preparing these consolidated statements. The Group plans to adopt these pronouncements when they become effective.

- Amendment to IAS 24, Related Party Disclosures (issued in November 2009 and effective for annual periods beginning on or after 1 January 2011). IAS 24 was revised in 2009 by: (a) simplifying the definition of a related party, clarifying its intended meaning and eliminating inconsistencies; and by (b) providing a partial exemption from the disclosure requirements for government-related entities. The Group expected that the revised standard does not have any effect on its financial statements.
- Amendment to IAS 32 *Classification of Rights Issues* - (issued 8 October 2009; effective for annual periods beginning on or after 1 February 2010). The amendment exempts certain rights issues of shares with proceeds denominated in foreign currencies from classification as financial derivatives. The Group expected that the revised standard does not have any effect on its financial statements.
- Recovery of Underlying Assets – Amendments to IAS 12 (issued in December 2010 and effective for annual periods beginning on or after 1 January 2012). The amendment introduced a rebuttable presumption that an investment property carried at fair value is recovered entirely through sale. This presumption is rebutted if the investment property is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. SIC-21, Income Taxes – Recovery of Revalued Non-Depreciable Assets, which addresses similar issues involving non-depreciable assets measured using the revaluation model in IAS 16, Property, Plant and Equipment, was incorporated into IAS 12 after excluding from its scope investment properties. The Group does not expect the amendments to have any material effect on its financial statements.

- IFRS 9, Financial Instruments Part 1: Classification and Measurement. IFRS 9 was issued in November 2009 and replaces those parts of IAS 39 relating to the classification and measurement of financial assets. Key features are as follows:

Financial assets are required to be classified into two measurement categories: those to be measured subsequently at fair value, and those to be measured subsequently at amortised cost. The decision is to be made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument.

An instrument is subsequently measured at amortised cost only if it is a debt instrument and both (i) the objective of the entity's business model is to hold the asset to collect the contractual cash flows, and (ii) the asset's contractual cash flows represent only payments of principal and interest (that is, it has only "basic loan features"). All other debt instruments are to be measured at fair value through profit or loss.

All equity instruments are to be measured subsequently at fair value. Equity instruments that are held for trading will be measured at fair value through profit or loss. For all other equity investments, an irrevocable election can be made at initial recognition, to recognise unrealised and realised fair value gains and losses through other comprehensive income rather than profit or loss. There is to be no recycling of fair value gains and losses to profit or loss. This election may be made on an instrument-by-instrument basis. Dividends are to be presented in profit or loss, as long as they represent a return on investment. While adoption of IFRS 9 is mandatory from 1 January 2013, earlier adoption is permitted. The Group expected that the revised standard does not have any effect on its financial statements.

- Disclosures—Transfers of Financial Assets – Amendments to IFRS 7 (issued in October 2010 and effective for annual periods beginning on or after 1 July 2011.). The amendment requires additional disclosures in respect of risk exposures arising from transferred financial assets. The amendment includes a requirement to disclose by class of asset the nature, carrying amount and a description of the risks and rewards of financial assets that have been transferred to another party yet remain on the entity's balance sheet. Disclosures are also required to enable a user to understand the amount of any associated liabilities, and the relationship between the financial assets and associated liabilities. Where financial assets have been derecognised but the entity is still exposed to certain risks and rewards associated with the transferred asset, additional disclosure are required to enable the effects of those risks to be understood. It did not expect to have significant impact on consolidated interim financial statements.
- Limited exemption from comparative IFRS 7 disclosures for first-time adopters - Amendment to IFRS 1 (effective for annual periods beginning on or after 1 July 2010). Existing IFRS preparers were granted relief from presenting comparative information for the new disclosures required by the March 2009 amendments to IFRS 7, Financial Instruments: Disclosures. This amendment to IFRS 1 provides first-time adopters with the same transition provisions as included in the amendment to IFRS 7. The Group expected that the amendments do not have any effect on its financial statements.

## **MOSENERGO Group**

### **Notes to Consolidated Interim Financial Statements**

(in millions of Russian Roubles)

---

- Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters – Amendments to IFRS 1 (issued in December 2010 and effective for annual periods beginning on or after 1 July 2011). The amendment regarding severe hyperinflation creates an additional exemption when an entity that has been subject to severe hyperinflation resumes presenting or presents for the first time, financial statements in accordance with IFRS. The exemption allows an entity to elect to measure certain assets and liabilities at fair value; and to use that fair value as the deemed cost in the opening IFRS statement of financial position. The IASB has also amended IFRS 1 to eliminate references to fixed dates for one exception and one exemption, both dealing with financial assets and liabilities. The first change requires first-time adopters to apply the derecognition requirements of IFRS prospectively from the date of transition, rather than from 1 January 2004. The second amendment relates to financial assets or liabilities where the fair value is established through valuation techniques at initial recognition and allows the guidance to be applied prospectively from the date of transition to IFRS rather than from 25 October 2002 or 1 January 2004. This means that a first-time adopter may not need to determine the fair value of certain financial assets and liabilities at initial recognition for periods prior to the date of transition. IFRS 9 has also been amended to reflect these changes. The Group does not expect the amendments to have any effect on its financial statements.
- IFRIC 19, Extinguishing Financial Liabilities with Equity Instruments (effective for annual periods beginning on or after 1 July 2010). This IFRIC clarifies the accounting when an entity settles its debt by issuing its own equity instruments. A gain or loss is recognised in profit or loss based on the fair value of the equity instruments compared to the carrying amount of the debt. The Group does not expect the amendments to have any material effect on its financial statements.
- Amendment to IFRIC 14, Prepayments of minimum funding requirement – (issued in November 2009; effective for annual periods beginning on or after 1 January 2011). The amendments clarifies recognition as an asset some voluntary prepayments for minimum funding contributions. The Group does not expect the amendments to have any material effect on its financial statements.
- Improvements to International Financial Reporting Standards (issued in May 2010 and effective for annual periods beginning after 1 January 2011). The improvements consist of a mixture of substantive changes and clarifications in the following standards and interpretations: IFRS 1 was amended (i) to allow previous GAAP carrying value to be used as deemed cost of an item of property, plant and equipment or an intangible asset if that item was used in operations subject to rate regulation, (ii) to allow an event driven revaluation to be used as deemed cost of property, plant and equipment even if the revaluation occurs during a period covered by the first IFRS financial statements and (iii) to require a first-time adopter to explain changes in accounting policies or in the IFRS 1 exemptions between its first IFRS interim report and its first IFRS financial statements; IFRS 3 was amended (i) to require measurement at fair value (unless another measurement basis is required by other IFRS standards) of non-controlling interests that are not present ownership interests or do not entitle the holder to a proportionate share of net assets in the event of liquidation, (ii) to provide guidance on acquire is share-based payment arrangements that were not replaced or were voluntarily replaced as a result of a business combination and (iii) to clarify that the contingent considerations from business combinations that occurred before the effective date of revised IFRS 3 (issued in January 2008) will be accounted for in accordance with the guidance in the previous version of IFRS 3; IFRS 7 was amended to clarify certain disclosure requirements, in particular (i) by adding an explicit emphasis on the interaction between qualitative and quantitative disclosures about the nature and extent of financial risks, (ii) by removing the requirement to disclose carrying amount of renegotiated financial assets that would otherwise be past due or impaired, (iii) by replacing the requirement to disclose the fair value of collateral by a more general requirement to disclose its financial effect, and (iv) by clarifying that an entity should disclose the amount of foreclosed collateral held at the reporting date and not the amount obtained during the reporting period; IAS 27 was amended by clarifying the transition rules for amendments to IAS 21, 28 and 31 made by the revised IAS 27 (as amended in January 2008); IAS 34 was amended to add additional examples of significant events and transactions requiring disclosure in a condensed interim financial report, including transfers between the levels of fair value hierarchy, changes in classification of financial assets or changes in business or economic environment that affect the fair values of the entity's financial instruments; and IFRIC 13 was amended to clarify measurement of fair value of award credits. The Group does not expect the amendments to have any material effect on its financial statements.

Unless otherwise described above, the new standards and interpretations are not expected to significantly affect the Group's financial statements.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

- (ii) The following new standards and amendments to standards are mandatory for the first time for the financial year beginning 1 January 2010.
- Amended IAS 27 *Consolidated and Separate Financial Statements (2008)* requires accounting for changes in ownership interests by the Group in a subsidiary, while maintaining control, to be recognised as an equity transaction. When the Group loses control of a subsidiary, any interest retained in the former subsidiary will be measured at fair value with the gain or loss recognised in profit or loss. The amendments to IAS 27, which become mandatory for the Group's 2011 consolidated interim financial statements, did not have a significant impact on the consolidated financial statements.
  - Amendment to IAS 39 *Financial Instruments: Recognition and – Measurement Eligible Hedged Items* clarifies how the principles that determine whether a hedged risk or portion of cash flows is eligible for designation should be applied in particular situations. The amendment, which becomes mandatory for the Group's 2011 financial statements, with retrospective application required, did not have a significant impact on the consolidated interim financial statements.
  - IFRS 1 *First-time Adoption of International Financial Reporting Standards* (following an amendment in December 2008, effective for the first IFRS financial statements for a period beginning on or after 1 July 2009). The revised IFRS 1 retains the substance of its previous version but within a changed structure in order to make it easier for the reader to understand and to better accommodate future changes. The Group concluded that the revised standard did not have a significant impact on the consolidated interim financial statements.
  - Additional Exemptions for First-time Adopters - Amendments to IFRS 1, First-time Adoption of IFRS (effective for annual periods beginning on or after 1 January 2010). The amendments exempt entities using the full cost method from retrospective application of IFRSs for oil and gas assets and also exempt entities with existing leasing contracts from reassessing the classification of those contracts in accordance with IFRIC 4, 'Determining Whether an Arrangement Contains a Lease' when the application of their national accounting requirements produced the same result. It did not have impact on consolidated interim financial statements.
  - Amendments to IFRS 2 *Group Cash-settled Share-based Payment Transactions, Share-based Payment* (effective for annual periods beginning on or after 1 January 2010). The amendments provide a clear basis to determine the classification of share-based payment awards in both consolidated and separate financial statements. The amendments incorporate into the standard the guidance in IFRIC 8 and IFRIC 11, which are withdrawn. The amendments expand on the guidance given in IFRIC 11 to address plans that were previously not considered in the interpretation. The amendments also clarify the defined terms in the Appendix to the standard. The Group concluded the amendments to have any material effect on its financial statements.
  - Revised IFRS 3 *Business Combinations* (2008) and amended IAS 27 (2008) *Consolidated and Separate Financial Statements* come into effect on 1 July 2009 (i.e. become mandatory for the Group's 2010 consolidated financial statements). The revisions address, among others, accounting for step acquisitions, require acquisition-related costs to be recognised as expenses and remove exception for changes in contingent consideration to be accounted by adjusting goodwill. The revisions also address how non-controlling interests in subsidiaries should be measured upon acquisition and require to recognise the effects of transactions with non-controlling interest directly in other comprehensive income. The amendments did not have a significant impact on the consolidated interim financial statements.
  - IFRIC 17 *Distributions of Non-cash Assets to Owners* addresses the accounting of non-cash dividend distributions to owners. The interpretation clarifies when and how the non-cash dividend should be recognised and how the differences between the dividend paid and the carrying amount of the net assets distributed should be recognised. IFRIC 17 comes into effect for annual periods beginning on or after 1 July 2009. It did not have significant impact on consolidated interim financial statements.
  - IFRIC 18 *Transfers of Assets from Customers* applies to the accounting for transfers of items of property, plant and equipment by entities that receive such transfers from their customers. The interpretation clarifies recognition and measurement of received items, how the resulting credit, as well as a transfer of cash from customers should be accounted for. IFRIC 18 is applied prospectively to transfers of assets from customers received on or after 1 July 2009. It did not have significant impact on consolidated interim financial statements.
  - Improvements to International Financial Reporting Standards (issued in April 2009; amendments to IFRS 2, IAS 38, IFRIC 9 and IFRIC 16 are effective for annual periods beginning on or after 1 July 2009; amendments to IFRS 5, IFRS 8, IAS 1, IAS 7, IAS 17, IAS 36 and IAS 39 are effective for annual periods beginning on or after 1 January 2010). The improvements consist of a mixture of substantive changes and clarifications in the following standards and interpretations: clarification that contributions of businesses in common control transactions and formation of joint ventures are not within the scope of IFRS 2; clarification of disclosure requirements set by IFRS 5 and other standards for non-current assets (or disposal groups) classified as held for sale or discontinued operations; requiring to report a measure of total assets and liabilities for each reportable segment under IFRS 8 only if such amounts are regularly

provided to the chief operating decision maker; amending IAS 1 to allow classification of certain liabilities settled by entity's own equity instruments as non-current; changing IAS 7 such that only expenditures that result in a recognised asset are eligible for classification as investing activities; allowing classification of certain long-term land leases as finance leases under IAS 17 even without transfer of ownership of the land at the end of the lease; providing additional guidance in IAS 18 for determining whether an entity acts as a principal or an agent; clarification in IAS 36 that a cash generating unit shall not be larger than an operating segment before aggregation; supplementing IAS 38 regarding measurement of the fair value of intangible assets acquired in a business combination; amending IAS 39 (i) to include in its scope option contracts that could result in business combinations, (ii) to clarify the period of reclassifying gains or losses on cash flow hedging instruments from other comprehensive income to profit or loss and (iii) to state that a prepayment option is closely related to the host contract if upon exercise the borrower reimburses economic loss of the lender; amending IFRIC 9 to state that embedded derivatives in contracts acquired in common control transactions and formation of joint ventures are not within its scope; and removing the restriction in IFRIC 16 that hedging instruments may not be held by the foreign operation that itself is being hedged. The Group concluded that the amendments to standards did not have a significant impact on the consolidated interim financial statements.

#### **Note 4. Determination of fair values**

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and / or disclosure purposes based on the methods, described further. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

##### **(a) Property, plant and equipment and investment property**

The fair value of property, plant and equipment and investment property is determined either using market approach, depreciated replacement cost or income approach.

The market value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The market value of items of plant, equipment, fixtures and fittings is based on quoted market prices for similar items.

When no quoted market prices are available, the fair value of property, plant and equipment is primarily determined applying depreciated replacement cost method or income approach. The depreciated replacement cost method considers the cost to reproduce or replace the property, plant and equipment, adjusted for physical, functional or economical depreciation, and obsolescence. Under the income approach, the values of the property are derived from the present value of future cash flows expected to be derived from the use and eventual sale of the property.

##### **(b) Investments in equity and debt securities**

The fair values of available-for-sale financial assets are determined by reference to their quoted closing bid price at the reporting date.

##### **(c) Trade and other receivables**

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date.

##### **(d) Non-derivative financial liabilities**

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. For finance leases the market rate of interest is determined by reference to similar lease agreements.

#### **Note 5. Financial risk management**

##### **(a) Overview**

The Group has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk, and
- market risk.

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

The General Director has overall responsibility for proper functioning of the Group's internal controls system. The Board of Directors establishes and oversees the Group's risk management framework and control environment mitigating those risks. The Audit Committee as part of Board of Directors evaluates the internal controls system effectiveness. The Group's Audit Committee is assisted in its oversight role by the Director of Internal Audit, who oversees how management monitors compliance with the Group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Direction of Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

The risk management functions are performed by several departments of the Company. Credit risk is considered by the Department on Account and Analysis of Financial Risks. Liquidity risk is addressed by the Treasury Department and the Department on Budgeting and Managerial Accounting. These departments are accountable to the Deputy General Director on Finance and Budgeting who supervises and coordinates the work of the risk management system.

The Group's risk management policies are summarized in the Company's Regulations on Risk Management which are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The procedures carried out in relation to the Company's risk analysis include examination of the customers reliability, analysis of bank guarantees for prepayments given to suppliers, bank currency position analysis, sensitivity analysis of exchange and interest rates for borrowings, budget implementation analysis etc.

The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive internal control environment in which all employees understand their roles and obligations.

**(b) Credit risk**

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

**(i) Trade and other receivables**

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. Geographically credit risk is concentrated in the city of Moscow and Moscow Region as most of sales are made in this area. Creditworthiness of existing customers is periodically evaluated based on internal and external information regarding history of settlements with these customers. The Group constantly analyzes accounts receivable turnover ratios, maturity dates and takes appropriate measures on collection of debts due. Approximately 90-95% of the customers are the clients of the Group for the period longer than 2-3 years.

There are standard contract terms for any customer purchasing energy under regulated contracts, the day-ahead market or the balancing market. Individual terms can be stipulated in free bilateral contracts for electricity (capacity). Special conditions are envisaged by the Russian legislation on Power industry for some heat consumers such as state companies, housing organizations and entities, which may not be limited or refused energy supply because it can lead to casualties or other harmful aftermath (hospitals, schools etc.). Currently no upper limits for debt due from a single customer are established. Gradually the Group plans to switch to 100% prepayment approach when the transitional period from regulated to free bilateral selling contracts will be completed.

In monitoring customer credit risk, customers are grouped according to the accounts receivable type and maturity dates. Accounts receivable are divided into five major groups, which are current, overdue, long-term, doubtful and irrecoverable accounts receivable. As early as an account receivable is classified as current measures are taken on collection of debt due, which include oral and written notices, instituting a claim, putting in a late payment penalty etc.

The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables and investments. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets.

**(ii) Guarantees**

The Group's policy does not stipulate providing any financial guarantees for customers.

**(iii) Investments**

The Group limits its exposure to credit risk by only investing in liquid securities and only with counterparties that have a credit rating of at least Baa 1 from Moody's and Aaa from Moody's, except for related parties. Given these high credit ratings, management does not expect any counterparty to fail to meet its obligations.

**(c) Liquidity risk**

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

---

liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The liquidity risk management is performed on three different levels. Long-term policies are incorporated in the overall financial model of the Company. Middle-term monitoring is fulfilled during the quarterly and monthly planning of the Group's budgets. Short-term actions include planning and control of daily cash receipts and payments of the Company.

Liquidity management system includes also drawing up monthly, quarterly and yearly cash budgets, comparing actual amounts to planned and explaining any discrepancies found.

**(d) Market risk**

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

**(i) Currency risk**

The Group is exposed to currency risk on purchases and borrowings that are denominated in a currency other than the respective functional currencies of Group entities. The currencies in which these transactions primarily are denominated are Euro, USD and Swiss Francs (CHF).

In respect of other monetary assets and liabilities denominated in foreign currencies, the Group ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

The Group's policy in respect of mitigating currency risk includes minimizing share of borrowings in foreign currencies comparing to total credit portfolio, which is 15% at 31 March 2011 (31 December 2010: 14%). To minimize currency risk the Group prepares budgets taking into account possible changes in exchange rates, creates special reserves to cover contingent expenses and losses. Currently the Group considers the possibility of hedging currency risks by means of corresponding derivatives in the future.

**(ii) Interest rate risk**

Changes in interest rates impact primarily loans and borrowings by changing either their fair value (fixed rate debt) or their future cash flows (variable rate debt). Management does not have a formal policy of determining how much of the Group's exposure should be to fixed or variable rates. However, at the time of raising new loans or borrowings management uses its judgment to decide whether it believes that a fixed or variable rate would be more favorable to the Group over the expected period until maturity.

The Group constantly analyses dynamics of variable interest rates. To minimize interest rate risk the Group prepares budgets taking into account possible changes of interest rates creates special reserves to cover contingent expenses and losses. Currently the Group considers the possibility of hedging currency risks using corresponding derivatives in the future.

**(e) Capital management**

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board of Directors monitors the return on capital, which the Group defines as net operating income divided by total shareholders' equity. The Board of Directors also monitors the level of dividends to ordinary shareholders.

There were no changes in the Group's approach to capital management during the year.

Consistent with other companies of the industry, the Group monitors capital on the basis of the gearing ratio. The ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings, as shown in the consolidated balance sheet, less cash. Total capital is calculated as equity, as shown in the consolidated balance sheet, plus the net debt.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

The gearing ratios at 31 March 2011 and at 31 December 2010 were as follows:

	<b>31 March 2011</b>	<b>31 December 2010</b>
Borrowings (Note 16)	(16,861)	(16,746)
Cash and cash equivalents (Note 14)	11,578	28,334
Net debt	(5,283)	11,588
Equity	(201,751)	(193,769)
<b>Total capital</b>	<b>(207,034)</b>	<b>(182,181)</b>
<b>Gearing ratio</b>	<b>2.55%</b>	<b>-</b>

The Group is subject to the following externally imposed capital requirements that have been established for joint stock companies by the legislation of Russian Federation:

- share capital cannot be lower than 1,000 minimum shares at the date of the company registration;
- if the share capital of the entity is greater than statutory net assets of the entity, such entity must decrease its share capital to the value not exceeding its net assets, and
- if the minimum allowed share capital is greater than statutory net assets of the entity, such entity is subject to liquidation.

At 31 March 2011, the Group was in compliance with the above share capital requirements.

**Note 6. Related party transactions**

The nature of the related party relationships for those related parties with whom the Group entered into significant transactions during the three months ended 31 March 2011 and the here months ended 31 March 2010 or had significant balances outstanding at 31 March 2011 and at 31 December 2010 are detailed below. OJSC “Gazprom” is an ultimate Parent Company of OJSC “Mosenergo” during the current and prior reporting periods. The Russian Federation is the ultimate controlling party of the Group during the current and prior reporting periods.

*(a) Transactions with Gazprom Group and its associates*

Company has the following turnover and balances outstanding with Gazprom Group and its associates.

**Revenue**

	<b>Three months ended 31 March 2011</b>	<b>Three months ended 31 March 2010</b>
Heat	38	25
Electricity	21	-
Other revenue	3	21
<b>Total</b>	<b>62</b>	<b>46</b>

**Expenses**

*Net book value had no revaluation taken place*

	<b>Buildings and constructions</b>	<b>Plant and equipment</b>	<b>Transmission networks</b>	<b>Other</b>	<b>Construction in progress</b>	<b>Total</b>
At 1 January 2010	32,981	32,735	2,594	7,879	19,098	<b>95,287</b>
At 31 March 2010	33,074	33,075	2,512	8,881	17,190	<b>94,732</b>
At 1 January 2011	33,370	37,862	2,476	2,561	15,692	<b>91,961</b>
At 31 March 2011	33,210	37,206	2,317	2,388	16,179	<b>91,300</b>

Borrowing costs of RR 396 million and RR 449 million for the three months ended 31 March 2011 and 31 March 2010, respectively, are capitalised in additions above. Capitalisation rates of 2.51% and 2.53% for the three months ended 31 March 2011 and 31 March 2010, respectively, were used to determine the amount of borrowing costs eligible for capitalization representing the weighted average of the borrowing costs applicable to the borrowings of the Group that are outstanding during the period.

There were no properties pledged as security for Company's bank loans at 31 March 2011 and 31 December 2010.

**(a) Revaluation**

The Group changed its accounting policy in respect of property, plant and equipment measurement from cost model to revaluation model starting from 1 January 2007 in order to provide users of the financial statements with more reliable information about the value of the Group's property, plant and equipment.

In 2008 the Group contracted an independent appraiser to estimate the fair value of the Group's property, plant and equipment at 31 December 2008. The fair value of property, plant and equipment was determined to be RR 195,307 million.

In 2010 the Group determined that the carrying amount of property, plant and equipment does not differ materially from that which would be determined using fair value at the end of reporting period and, therefore, revaluation was not performed in 2010.

**(b) Impairment test**

The Group assessed at 31 December 2010 whether there were any indicators that the Group assets may be impaired. During the procedure both external and internal indications were considered that could require the Group to estimate the recoverable amount of the assets.

At 31 December 2010 the Company assessed the indicators of the assets impairment through the sensitivity analysis, performed by the independent appraiser and concluded that significant changes with adverse effect did not take place in the period on the entity in the technological, market, economic or legal environment in which the entity operates as well as in the segment to which assets are dedicated. Additionally, there is strong evidence of an absence of physical obsolescence and damage of particular assets, as well as the worsening of economic performance of assets. Therefore impairment test was not performed at the reporting date.

For the purposes of impairment test the recoverable amount was determined as value in use and the following key assumptions were used:

- 21 cash-generating units were identified;
- Cash flows were projected based on actual operating results and the 12-year business plan;
- The anticipated annual production growth included in cash flow projections was 3.5%;
- A discount rate of 13.11% was applied in determining the recoverable amount of the plants.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

The Group continues to be in the process of disposing non-core assets included in property, plant and equipment, which were reclassified to the assets held for sale during the reporting period. Before transferring assets to the disposed group a valuation was obtained for such items and, resultantly, a decrease in fair value of RR 1 million (three months ended 31 March 2010: RR 0 million) was recognized in the consolidated interim statement of change in equity for the three months ended 31 March 2011.

(c) *Leased assets*

The Group leases production plant and equipment under a number of finance lease agreements. All leases provide the Group with the option to purchase the buildings and equipment at a beneficial price. The leased plant and equipment secures lease obligations (see Note 31). At 31 March 2011 and at 31 December 2010 the net carrying amount of leased plant was RR 281 million and RR 300 million, respectively.

**Note 8. Investment property**

	<b>2011</b>	<b>2010</b>
<b>Balance at 1 January</b>	<b>898</b>	<b>1,020</b>
<b>Balance at 31 March</b>	<b>898</b>	<b>1,020</b>

The fair value of the Group's investment property at 31 March 2011 was determined to be RR 898 million (31 December 2010: RR 898 million) and based on the market trends for the three months 2011.

Rental income for the three months ended 31 March 2011 and for the three months ended 31 March 2010 amounted to RR 24 million and RR 20 million respectively, was recognised in the consolidated interim statement of comprehensive income in other revenue.

Where the Group is the lessor, the future minimum lease payments receivable under non-cancellable operating leases are as follows:

	<b>31 March 2011</b>	<b>31 December 2010</b>
Less than one year	100	91
Between one and five years	-	-
More than five years	-	-
<b>Total</b>	<b>100</b>	<b>91</b>

<b>Total</b>		<b>9,949</b>		<b>24,529</b>

**Note 15. Equity**

*(a) Share capital and share premium*

At 31 March 2011 the authorised share capital comprised 39,749,359,700 ordinary shares (31 December 2010: 39,749,359,700) of RR 1.00 par value each. All issued shares are fully paid.

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company. In respect of the Company's shares that are held by the Group (see below), all rights are suspended until those shares are reissued.

Share premium amounted to RR 49,213 million represents excess of the cash proceeds from the issue of share capital over its par value net of the transaction costs amounted to RR 7 million.

*(b) Treasury stock*

Treasury stock represents cost of Company's shares held by the Group. At 31 December 2008 the Group held 163,904,251 of the Company's own shares. Within the period from 15 April 2009 to 27 April 2009 the Group came to the decision to sell 23,674,800 shares. Proceeds from the sale amounted to RR 34 million.

Thus the treasury stock at 31 March 2011 and at 31 December 2010 amounted to RR 871 million.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

No decisions regarding further operations with treasury stock were made by the Company's management.

**(c) Reserves**

At 31 March 2011 reserves composed of the revaluation of available-for-sale financial assets in amount of RR 10 million (31 December 2010: RR 8 million) and the revaluation reserve relates to the revaluation of property, plant and equipment in amount of RR 86,630 million (31 December 2010: RR 86,631 million).

**(d) Dividends**

In June 2010 the general shareholders meeting made the decision to pay dividends for the result of financial year 2009. The amount of declared dividends on the issuer's shares was RR 0.01262335 per share, total amount of dividends is RR 500 million.

The decisions related to dividends distribution for fiscal year 2010 are scheduled at the general shareholders' meeting in June 2011.

**Note 16. Borrowings**

The note provides information about the contractual terms of the Group's interest-bearing borrowings, which are measured at amortized cost.

	31 March 2011	31 December 2010
<b>Non-current borrowings</b>

(in millions of Russian Roubles)

**Note 17. Employee benefits**

The Company sponsors a post-employment and other long-term benefit program that covers the majority of the Company's employees. The plan was changed in July 2008 and since this date principally consists of a defined contribution plan enabling employees to contribute a portion of their salary to the plan and equivalent portion of contribution from the Company. The plan is administrated by non-state pension fund.

To be entitled for participation in this new defined contribution pension plan an employee should meet certain age and past service requirements. Maximum possible amount of employer's contribution is limited and depends on employee's position in the Company.

In addition to defined contribution pension plan the Company maintains several plans of a defined benefit nature which are provided in accordance with collective bargaining agreement. The main benefits provided under this agreement are lump sum upon retirement and material assistance.

A new collective employment agreement came into force since 1 January 2011. There were no significant changes benefits compared to the version effective in prior year.

During the three months of 2011 the Company has been finished implementing a restructuring programme which resulted in redundancies recognised as a curtailment. Compensations for redundancies paid by the Company for the three months ended 31 March 2011 and for the three months ended 31 March 2010 amounted to RR 4 million and RR 348 million, respectively, were recognised in the consolidated interim statement of comprehensive income in personal expenses.

	<b>31 March 2011</b>	<b>31 December 2010</b>
Present value of unfunded obligations	297	512
Recognised liability for defined benefit obligations	297	512
Unrecognised actuarial gain	(10)	(18)
Unrecognised past service cost	(79)	(84)
<b>Net liability recognised in balance sheet</b>	<b>208</b>	<b>410</b>

*(a) Movement in the present value of the defined benefit obligations*

	<b>2011</b>	<b>2010</b>
Defined benefit obligations at 1 January	512	489
Interest on employee benefit obligations	6	11
Current service cost	2	5
Benefits paid	(1)	(5)
Effect of settlement	-	(89)
Actuarial (gain)/losses	(9)	23
Past service cost (immediate recognition)	(213)	-
<b>Defined benefit obligations at 31 March</b>	<b>297</b>	<b>434</b>

*(b) Expenses recognised in profit or loss*

	<b>Three months ended 31 March 2011</b>	<b>Three months ended 31 March 2010</b>
Interest on employee benefit obligations	6	11

Assets classified as held for sale	(117)	20	-	(29)	(126)
Investment property	(54)	(1)	-	-	(55)
Trade and other receivables	32	(43)	-	-	(11)
Trade and other payables	128	(29)	-	-	99
Employee benefits	82	(40)	-	-	42
Provisions	14	(6)	-	-	8
Borrowings	(190)	13	-	-	(177)
Other	(5)	11	(2)	-	4
<b>Total</b>	<b>(24,875)</b>	<b>95</b>	<b>(2)</b>	<b>-</b>	<b>(24,782)</b>

**Note 29. Earnings per share**

The calculation of basic earnings per share was based on the profit attributable to ordinary shareholders and weighted average number of ordinary shares outstanding, calculated as follows:

	<b>Three months ended 31 March 2011</b>	<b>Three months ended 31 March 2010</b>
Issued shares	39,749,360	39,749,360
Effect of own shares held	(140,229)	(140,229)
<b>Weighted average number of ordinary shares (thousands)</b>	<b>39,609,131</b>	<b>39,609,131</b>

The following is a reconciliation of the profit attributable to ordinary shareholders:

	<b>Three months ended 31 March 2011</b>	<b>Three months ended 31 March 2010</b>
Weighted average number of ordinary shares issued (thousands)	39,609,131	39,609,131
Profit for the period	7,981	5,627
<b>Profit per ordinary share (basic and diluted) (in Russian Roubles)</b>	<b>0.20</b>	<b>0.14</b>

**Note 30. Financial instruments**

(a) *Credit risk*

(i) *Exposure to credit risk*

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	Carrying amount	
	31 March 2011	31 December 2010
<b>Held-to-maturity investments</b>	<b>7,479</b>	<b>-</b>
Investments (Note 11)	7,479	-
<b>Loans and receivables</b>	<b>35,317</b>	<b>18,886</b>
Trade and other receivables (Note 12)	35,317	18,886
<b>Available-for-sale financial assets</b>	<b>18</b>	<b>13</b>
Other non-current assets (Note 13)	18	13
<b>Cash and cash equivalents</b> (Note 14)	<b>11,578</b>	<b>28,334</b>
<b>Total financial assets</b>	<b>54,392</b>	<b>47,233</b>

The maximum exposure to credit risk for receivables at the reporting date by type of sales was:

	Carrying amount	
	31 March 2011	31 December 2010
Heat	19,694	11,408
Electricity	11,915	3,777
Other	3,708	3,701
<b>Total</b>	<b>35,317</b>	<b>18,886</b>

Debtors within two main classes of accounts receivable – electricity and heat – are quite homogenous regarding their credit quality and concentration of credit risk.

The account receivables of the Group are primarily comprised of a few, large, reputed customers who purchase electricity and heat. Historical data, including payment history during the recent credit crisis, would suggest that the risk of default from such customers is very low.

The most important customers of the Group, OJSC “MOEK” and CJSC “CFR” accounts for RR 14,246 million and RR 7,229 million, respectively, for the trade receivables carrying amount at 31 March 2011 (31 December 2010: RR 7,707 million and RR 3,556 million, respectively).

(ii) *Impairment losses*

The aging of trade and other receivables at the reporting date was:

	31 March 2011		31 December 2010	
	Gross	Impairment	Gross	Impairment
Not past due	13,880	-	14,469	-
Past due 0-30 days	11,916	-	2,333	-
Past due 31-120 days	7,564	-	402	-
Past due 121-365 days	1,896	-	1,600	-
More than one year	1,796	1,735	1,516	1,434
<b>Total</b>	<b>37,052</b>	<b>1,735</b>	<b>20,320</b>	<b>1,434</b>

The movement in the allowance for impairment in respect of trade and other receivables during the period was as follows:

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

	<b>2011</b>	<b>2010</b>
Balance at 1 January	1,434	1,590
Impairment loss recognized during the period	302	45
Allowance used during the period	(1)	(34)
<b>Balance at 31 March</b>	<b>1,735</b>	<b>1,601</b>

The impairment allowance at 31 March 2011 of RR 1,735 million (31 December 2010: RR 1,434 million) relates to the customers that were declared bankrupt or had significant liquidity problems during the reporting period.

Based on historic default rates, the Group believes that no impairment allowance is necessary in respect of trade and other receivables not past due or past due by up to 365 days; 96.86 percent of the balance (at 31 December 2010: 92.54 percent), which includes the amount owed by the most significant customer of the Group (see above), relates to customers that have a good track record with the Group.

The allowance accounts in respect of trade and other receivables are used to record impairment losses unless the Group is satisfied that no recovery of the amount owing is possible; at that point the amount is considered irrecoverable and written off against the financial asset directly.

**(iii) Credit risk related to the Group's cash in banks**

All bank balances are neither past due nor impaired. Analysis by credit quality of bank balances is as follows:

Name of the bank	Rating agency	Rating	31 March		31 December	
			2011	Rating	2010	Rating
OJSC "Gazprombank"	Standard & Poor's	ruAA	6,764	ruAA	8,478	
OJSC "AB "Russia"	Moody's Interfax	Baa1.ru	2,815	Aa3.ru	3,084	
OJSC "Alfa-Bank"	Fitch Ratings	AA-(rus)	1,219	A-(rus)	3,507	
OJSC "Sberbank Russia"	Moody's Interfax	Aaa.ru	777	Aaa.ru	1	
OJSC Bank "VTB"	Fitch Ratings	AAA (rus)	-	AAA (rus)	13,260	
Other	-	-	3	-	4	
<b>Total</b>			<b>11,578</b>		<b>28,334</b>	

The Company pursues the policy of cooperation with a number of the top Russian banks, which is approved by the Board of Directors.

**(b) Liquidity risk**

The following are the contractual maturities of financial liabilities, including estimated interest payments at 31 March 2011:

	Carrying amount	Contractual cash flows	0-6 mths	6-12 mths	1-2 yrs	2-3 yrs	3-4 yrs	4-5 yrs	Over 5 yrs
<b>Non-derivative financial liabilities</b>									
Unsecured bank loans	2,449	4,234	174	351	678	663	451	259	1,658
Unsecured bond issues	14,412	16,014	-	5,538	10,476	-	-	-	-
Trade and other payables	10,668	10,668	10,668	-	-	-	-	-	-
<b>Total</b>	<b>27,529</b>	<b>30,916</b>	<b>10,842</b>	<b>5,889</b>	<b>11,154</b>	<b>663</b>	<b>451</b>	<b>259</b>	<b>1,658</b>

The following are the contractual maturities of financial liabilities, including estimated interest payments at 31 December 2010

	Carrying amount	Contractual cash flows	0-6 mths	6-12 mths	1-2 yrs	2-3 yrs	3-4 yrs	4-5 yrs	Over 5 yrs
<b>Non-derivative financial liabilities</b>									
Unsecured bank loans	2,334	4,234	174	351	678	663	451	259	1,658
Unsecured bond issues	14,412	16,559	727	5,356	10,476	-	-	-	-
Trade and other payables	12,786	12,786	12,786	-	-	-	-	-	-
<b>Total</b>	<b>29,532</b>	<b>33,579</b>	<b>13,687</b>	<b>5,707</b>	<b>11,154</b>	<b>663</b>	<b>451</b>	<b>259</b>	<b>1,658</b>

All of the Group's financial liabilities are carried at amortized cost.

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

(c) *Currency risk*

(i) *Exposure to currency risk*

	31 March 2011	31 December 2010
	EURO-denominated	EURO-denominated
Unsecured bank loans	(2,449)	(2,334)
<b>Gross balance sheet exposure</b>	<b>(2,449)</b>	<b>(2,334)</b>
Estimated forecasted interest expenses	(109)	(73)
<b>Gross exposure</b>	<b>(109)</b>	<b>(73)</b>
<b>Net exposure</b>	<b>(2,558)</b>	<b>(2,407)</b>

The following significant exchange rates applied during the period:

	Average rate		Reporting date spot rate	
	31 March 2011	31 December 2010	31 March 2011	31 December 2010
EURO 1	40.0340	40.2980	40.0223	40.3331

(ii) *Sensitivity analysis*

A 1% strengthening of the RR against EUR at 31 March 2011 would have increased equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 31 December 2010.

	31 March 2011	31 December 2010
EURO	17	16

A 1% weakening of the RR against the EUR at 31 March 2011 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

The actual decrease in the average exchange rates for the period ended 31 March 2011 was approximately 1% for the EURO (31 December 2010: 9%), although the difference between the two actual extremes in the reported period was approximately 4% (31 December 2010: 16%).

(d) *Interest rate risk*

(i) *Profile*

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

	Carrying amount	
	31 March 2011	31 December 2010
<b>Fixed rate instruments</b>		
Financial assets (Note 11, 12, 13 and 14)	54,392	47,233
Financial liabilities (Note 16,18)	(25,952)	(28,068)
<b>Total</b>	<b>28,440</b>	<b>19,165</b>
<b>Variable rate instruments</b>		
Financial liabilities (Note 16)	(1,577)	(1,464)
<b>Total</b>	<b>(1,577)</b>	<b>(1,464)</b>

(ii) *Fair value sensitivity analysis for fixed rate instruments*

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss, and the Group does not designate derivatives (interest rate swaps) as hedging instruments under a fair value hedge accounting model. Therefore a change in interest rates at the reporting date would not affect profit or loss.

(iii) *Cash flow sensitivity analysis for variable rate instruments*

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

A change of 100 basis points in interest rates at the reporting date would have increased (decreased) profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 31 December 2010.

	31 March 2011		31 March 2010	
	100 bp increase	100 bp decrease	100 bp increase	100 bp decrease
Variable rate instruments	(5.6)	5.6	(6.9)	6.9
<b>Cash flow sensitivity (net)</b>	<b>(5.6)</b>	<b>5.6</b>	<b>(6.9)</b>	<b>6.9</b>

(e) *Fair values*

The management believes that the fair value of the Group's financial assets and liabilities approximates their carrying amounts:

	31 March 2011		31 December 2010	
	Carrying amount	Fair value	Carrying amount	Fair value
Investments (Note 11)	7,479	7,479	-	-
Trade and other receivables (Note 12)	35,317	35,317	18,886	18,886
Available-for-sale financial assets (Note 13)	18	18	13	13
Cash and cash equivalents (Note 14)	11,578	11,578	28,334	28,334
Unsecured bank loans (Note 16)	(2,449)	(2,449)	(2,334)	(2,334)
Unsecured bond issues (Note 16)	(14,412)	(14,904)	(14,412)	(14,951)
Trade and other payables (Note 18)	(10,668)	(10,668)	(12,786)	(12,786)

The basis for determining fair values is disclosed in Note 4.

The interest rates used to discount estimated cash flows, where applicable, are based on the government yield curve at the reporting date plus credit spread, were as follows:

	31 March 2011	31 December 2010
Borrowings	10.9	12.1

**Note 31. Leases**

(a) *Operating leases*

Operating leases refer mainly to long-term rental agreements for land rent where generation facilities of the Group are located. The leases typically run for a periods from 5 to 45 years with an option to renew the lease. During the three months ended 31 March 2011 and the three months ended 31 March 2010 operating lease expenses in amount of RR 138 million and RR 191 million respectively were recognised in profit or loss.

Non-cancellable operating lease rentals are payable as follows:

	31 March 2011	31 December 2010
Less than one year	399	383
Between one and five years	1,596	1,529
More than five years	9,296	9,819
<b>Total</b>	<b>11,291</b>	<b>11,731</b>

(b) *Finance leases*

Finance lease rentals are payable as follows (see Note 7):

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

	31 March 2011			31 December 2010		
	Future minimum lease payments	Interest	Present value of minimum lease payments	Future minimum lease payments	Interest	Present value of minimum lease payments
Less than one year	69	12	57	127	25	102
Between one and five years	16	3	13	24	5	19
More than five years	-	-	-	-	-	-
<b>Total</b>	<b>85</b>	<b>15</b>	<b>70</b>	<b>151</b>	<b>30</b>	<b>121</b>

**Note 32. Commitments and contingencies**

*(a) Capital commitments*

At 31 March 2011 the Group was involved in a number of contracts for construction and purchase of property, plant and equipment for RR 12,737 million (at 31 December 2010: RR 13,376 million.). The amount includes Capacity Supply Contracts capital commitments for the amount RR 5,792 million (at 31 December 2010: RR 6,483 million).

*(b) Taxation environment*

The taxation systems in the Russian Federation are relatively new and are characterized by numerous taxes and frequently changing legislation, which is often unclear, contradictory, and subject to interpretation. Often, differing interpretations exist among different tax authorities within the same jurisdictions and among taxing authorities in different jurisdictions. Taxes are subject to review and investigation by a number of authorities, which are enabled by law to impose severe fines, penalties and interest charges. In the Russian Federation a tax year remains open for review by the tax authorities during the three subsequent calendar years; however, under certain circumstances a tax year may remain open longer. Recent events within the Russian Federation suggest that the tax authorities are taking a more assertive position in their interpretation and enforcement of tax legislation.

Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Russian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these consolidated financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

*(c) Environmental liabilities*

Environmental regulations are currently in the process of development in the Russian Federation. Group evaluates on a regular basis its obligations due to new and amended legislation. As liabilities in respect of environmental obligations can be measured, they are immediately recognised in profit or loss. Currently the likelihood and amount of potential environmental liabilities cannot be estimated reliably but could be material. However, management believes that under existing legislation there are no significant underscored liabilities or contingencies, which could have a materially adverse effect on the operating results or financial position of the Group.

*(d) Insurance*

The insurance industry in the Russian Federation is in a developing stage and many forms of insurance protection common in other parts of the world are not generally available. Management believes that the Group has adequate property damage coverage for its main production assets. The Group does not have full coverage for business interruption and third party liability. Until the Group obtains adequate insurance coverage, there is a risk that the loss from business interruption and third party liability could have a material adverse effect on the Group's operations and financial position.

*(e) Guarantees*

The Group has issued direct guarantees to third parties which require the Group to make contingent payments based on the occurrence of certain events consisting primarily of guarantees for mortgages of Group employees amounted to RR 168 million as of 31 March 2011 (31 December 2010: RR 208 million).

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

**Note 33. Operating segments**

The chief operating decision-maker has been identified as the Board of Directors and Chief Executive Officer. The decision-maker reviews the Group's internal reporting in order to assess performance and allocate resources. The Group has determined the operating segments based on these reports to be individual power generating units.

The decision-maker assesses the operating performance of these individual power generating units based on their gross margin which is calculated as revenue less directly attributable costs. Interest income and expenditure are not allocated to this measure as these are central costs of the Group. Other information provided to the decision-maker is measured in a manner consistent with that in the financial statements.

The operating segments are aggregated into two primary reporting segments; electricity and heat. Despite of the fact that there are modernized and unmodernized power generating units amongst operating segments which show significantly different gross margins, this aggregation is premised on the identical nature of their products, production process, the class of customers, the methods used to distribute their products and the nature of the regulatory environment. This aggregation results from the similar economic characteristics, over the long run, of these two distinct outputs.

Other services and products sold by the Group mainly include rent services, feed water sales, agricultural products, and maintenance services. These are not included within the reportable operating segments. The results of these operations are included in the "all other segments" column.

Taxes balances and available-for-sale financial assets are not considered to be segment assets but rather are managed by the central function. These are part of the reconciliation to total consolidated balance sheet assets.

*(a) Segment information*

The segment information for the three months ended 31 March 2011 and at 31 March 2011 is as follows:

	Note	Heat	Electricity	All other segments	Total
<b>Revenue from external customers</b>	<b>21</b>	<b>32,183</b>	<b>27,457</b>	<b>615</b>	<b>60,255</b>
Expenses:					
Fuel and water usage expenses	22	-	(27,990)	-	(27,990)
Purchase heat	22	(384)	-	-	(384)
Purchase electricity	22	-	(2,809)	-	(2,809)
Heat transmission		(12,262)	-	-	(12,262)
<b>Gross margin</b>		<b>19,537</b>	<b>(3,342)</b>	<b>615</b>	<b>16,810</b>
<b>Segment assets</b>		<b>30,134</b>	<b>205,320</b>	<b>25,962</b>	<b>261,416</b>

The segment information for the three months ended 31 March 2010 and at 31 December 2010 is as follows:

	Note	Heat	Electricity	All other segments	Total
<b>Revenue from external customers</b>	<b>21</b>	<b>28,634</b>	<b>21,204</b>	<b>889</b>	<b>50,727</b>
Expenses:					
Fuel and water usage expenses	22	-	(24,330)	-	(24,330)
Purchase heat	22	(361)	-	-	(361)
Purchase electricity	22	-	(731)	-	(731)
Heat transmission		(11,205)	-	-	(11,205)
<b>Gross margin</b>		<b>17,068</b>	<b>(3,857)</b>	<b>889</b>	<b>14,100</b>
<b>Segment assets</b>		<b>21,999</b>	<b>214,503</b>	<b>19,130</b>	<b>255,632</b>

The segment assets include impairment loss recognised for property, plant and equipment for the three months 31 March 2011 in total amount RR 1 million which was allocated to electricity segment (as at 31 December 2010: RR 83 million).

A reconciliation of adjusted gross margin to profit before tax provided as follows:

**MOSENERGO Group**  
**Notes to Consolidated Interim Financial Statements**  
(in millions of Russian Roubles)

	<b>Note</b>	<b>31 March 2011</b>	<b>31 March 2010</b>
Gross margin for reportable segments		16,195	13,211
Other segments gross margin		615	889
Financial income	27	278	766
Other operating income	26	340	307
Depreciation of property, plant and equipment	7	(3,020)	(2,984)
Personnel expenses	24	(1,850)	(2,981)
Maintenance and repairs expenses		(347)	(346)
Other operating expenses	25	(826)	(664)
Taxes other than income tax		(639)	(665)
Other external supplies	23	(546)	(564)
Other materials expenses	22	(222)	(185)
Financial expenses	27	(27)	(53)
<b>Profit before income tax</b>		<b>(9,951)</b>	<b>(6,731)</b>

**(b) Reportable segments' assets**

The amounts provided to the decision makers with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset.

Reportable segments' assets are reconciled to total assets as follows:

	<b>Note</b>	<b>31 March 2011</b>	<b>31 December 2010</b>
Segment assets		261,416	255,632
<b>Unallocated:</b>			
Income tax receivables		147	17
Available-for-sale investments	13	18	13
Taxes other than income tax prepaid	12	29	39
<b>Total assets per consolidated statement of financial position</b>		<b>261,610</b>	<b>255,701</b>

**(c) Information about major customers**

During the three months ended 31 March 2011 there were certain external customers, revenues from transactions with whom exceeded 10% of the Group's revenues:

- Revenue from OJSC "MOEK" for the three months ended 31 March 2011 amounted to RR 20,535 million. The revenue was obtained from sales of heat relating to heat segment.
- Revenue from CJSC "ZFR" for the three months ended 31 March 2011 amounted to RR 18,634 million. The revenue was obtained from sales of electricity and capacity relating to electricity segment.
- Revenue from OJSC "Mosenergosbyt" for the three months ended 31 March 2011 amounted to RR 4,389 million. The revenue was obtained from sales of electricity and capacity relating to electricity segment.

During the three months ended 31 March 2010 there were certain external customers, revenues from transactions with whom exceeded 10% of the Group's revenues:

- Revenue from OJSC "MOEK" for the three months ended 31 March 2010 amounted to RR 18,164 million, respectively. The revenue was obtained from sales of heat relating to heat segment.
- Revenue from CJSC "ZFR" for the three months ended 31 March 2010 amounted to RR 13,408 million. The revenue was obtained from sales of electricity and capacity relating to electricity segment.
- Revenue from OJSC "Mosenergosbyt" for the three months ended 31 March 2010 amounted to RR 6,809 million. The revenue was obtained from sales of electricity and capacity relating to electricity segment.
